

Invitation to join our Pilot Project

Industrial-Grade
Secure File Sharing

“What is the weakest link in data transfer in AM?”

Two commonly cited opinions based on 150 interviews with partners:

- 1. NOT SUFFICIENTLY SECURED EXTERNAL DATA TRANSFER**
- 2. UNPROTECTED INTERNAL DATA TRANSFER**

“Nobody cared for security, just because AM was mainly a prototyping application”

“Digital rights are still not protected”

“Lack of end-to-end encryption, from model design to printer”

“Secure File Exchange with Colleagues and Customers not existing”

To solve the problem

“How to exchange data with development parties, suppliers or contractors easily, reliably and securely without compromising your intellectual property?”

The SDAM Alliance initiated the Pilot Project Industrial-Grade Secure File Sharing

“Secure AM File Sharing

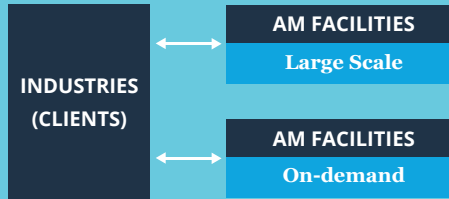

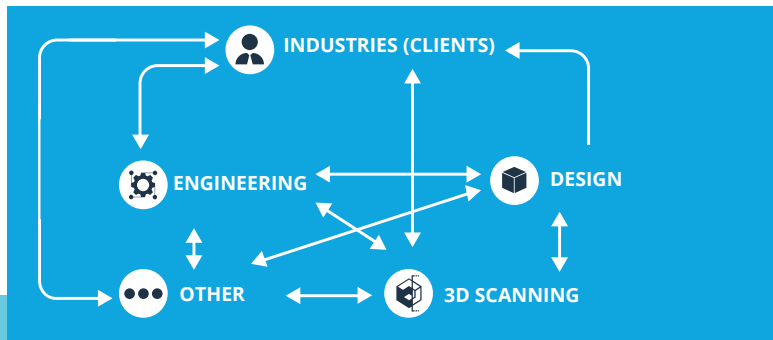

In cooperation with 3 partners of the SDAM Alliance, the Pilot Project is based on

- Proven secure web-based data exchange platform for industries (already in use by hundreds of large and small manufacturing industries)
- Maximum security thanks to multi-level data encryption
- Access to the data exchange functionalities in users’ familiar working environment

Key user groups

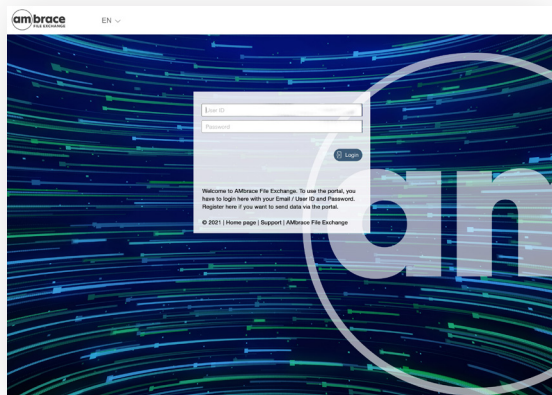

Secure AM File Sharing

HOW TO JOIN THIS IMPORTANT RESEARCH PROJECT

Each partner of the SDAM Alliance can participate

- Free Usage for each Partner
- Participants are expected to provide feedback to evaluate and optimise AM functionalities

Pilot Project period

October 2021 - March 2022

WHY JOIN?

- To solve the problems you and your colleagues have when exchanging data with designers, providers, engineers, clients and all other parties
- To make the collaborative nature of the AM industry secure, reliable and efficient

EXTRA: A FINANCIAL REWARD FOR EACH PARTICIPANT

Free access (as long as you want) for up to 5 user accounts
